Ref: SunCoast Electric and Networking, Inc.

To Whom It May Concern:

As Project Manager for Skanska on the Florida A & M University's North Regional Pond Expansion project, I was fortunate to have had the opportunity to work with SunCoast Electric and Networking, Inc. We were approached by Mr. Tracy Lee to bid on this project literally at the "twelfth hour" and they not only got their proposal in to us expediently, but were also the lowest bidder.

As a first class, world class construction management company, Skanska prides itself in associating with subcontractors that agree to our code of conduct, safety commitments, and quality of service. SunCoast has definitely established themselves as a prime partner in accomplishing these goals. The workers were punctual and consistent in their daily tasks. They participated in Stretch and Flex each morning and wore their safety gear without being told to do so. Daily Task Reports were completed and the site was left clean.

The overall experience with SunCoast was exceptional. From the office staff, project manager, to the foreman it was a true pleasure to work with them. I am appreciative of their efforts and would recommend them to anyone that wants quality work without hassle. I welcome the opportunity to work with them again!

Sincerely,

*Linda Porter*

Project Manager
